In her groundbreaking book, *Black to the Future*, historian and activist Kimberly Jones examines the history of racial inequality in America and its impact on the present day. Jones argues that the legacy of slavery, Jim Crow, and mass incarceration has created a system of structural racism that continues to oppress Black people today.

Jones's book is a powerful indictment of the racism that has plagued America for centuries. She provides a detailed account of the ways in which racism has shaped our laws, our institutions, and our culture. She also shows how racism has had a devastating impact on the lives of Black people, leading to poverty, violence, and mass incarceration.

But Black to the Future is not just a history of racism. It is also a roadmap for how we can create a more just and equitable future for all. Jones offers a series of concrete proposals for how we can dismantle the system of structural racism and build a more just society.

One of the most important things we can do, Jones argues, is to educate ourselves about the history of racism in America. We need to understand how racism has shaped our society and how it continues to oppress Black people today. Only then can we begin to dismantle the system of structural racism and build a more just future.

Jones also calls for us to build solidarity with Black people and other marginalized groups. We need to stand up against racism in all its forms and work together to create a more just and equitable society for all.

Black to the Future is a powerful and important book that everyone should read. It is a call to action for all of us to work together to create a more just and equitable future for all.
