

Internal Slave Trades In The Americas: The David Brion Davis Series

The history of slavery in the Americas is often told through the lens of the transatlantic slave trade, which transported millions of Africans across the Atlantic Ocean to the Americas. However, there was another, equally important, slave trade that took place within the Americas: the internal slave trade.

The internal slave trade was the forced migration of slaves from one part of the Americas to another. This trade was driven by the demand for labor in the plantation colonies of the Caribbean and the American South. Slaves were also traded between the colonies and the mainland colonies, and between the mainland colonies and the Spanish and Portuguese colonies in South America.

The internal slave trade was a brutal and dehumanizing process. Slaves were often packed into crowded ships and forced to endure long and dangerous journeys. They were sold at auction like cattle, and they were subjected to all kinds of abuse and violence.

The internal slave trade had a profound impact on the lives of slaves in the Americas. It separated families, destroyed communities, and created a constant state of fear and uncertainty. It also contributed to the development of a racial hierarchy in the Americas, with whites at the top and blacks at the bottom.
