

Israel National Security: The Arab Position and Its Complicated Relations

Israel's national security is a complex and multifaceted issue that has been shaped by a variety of historical, political, and cultural factors. The Arab-Israeli conflict has been a major factor in shaping Israel's national security policy, and the two sides have a long and complicated history. This book provides an in-depth analysis of Israel's national security and its relationship with the Arab world.

Historical Context

The roots of the Arab-Israeli conflict lie in the early 20th century, when the British Mandate for Palestine was established. The Mandate was intended to create a homeland for the Jewish people, but it also led to increased tensions between Jews and Arabs. In 1948, the State of Israel was declared, and the Arab-Israeli War broke out. The war ended with a ceasefire, but the conflict has continued to simmer ever since.

The Arab Position

The Arab position on Israel's national security is complex and varies depending on the country. Some Arab states, such as Egypt and Jordan, have made peace with Israel, while others, such as Syria and Lebanon, remain hostile. The Arab League has long called for a two-state solution to the conflict, with Israel and a Palestinian state living side by side. However, there is still much disagreement over the terms of a peace agreement.

Israel's National Security Policy

Israel's national security policy is based on the principle of deterrence. Israel maintains a strong military and intelligence apparatus, and it has a policy of retaliating against any attacks on its territory. Israel has also developed a number of security measures, such as the Iron Dome missile defense system, to protect its citizens.

The Challenges and Opportunities for Peace and Cooperation

The Arab-Israeli conflict has been a major obstacle to peace and stability in the Middle East. However, there have been some signs of progress in recent years. In 1993, Israel and the Palestine Liberation Organization (PLO) signed the Oslo Accords, which were intended to create a framework for a two-state solution to the conflict. However, the Accords have been stalled by a number of factors, including the continued violence between Israelis and Palestinians.

Despite the challenges, there are still opportunities for peace and cooperation between Israelis and Arabs. The two sides have a long history

of shared cultural and economic ties, and there is a growing recognition that both sides have a vested interest in a peaceful and stable Middle East.
