

The Last-Minute Guide to ICD-10 for Coders, Non-Coders, and Clinical Teams: A Comprehensive Review

The International Classification of Diseases, Tenth Revision (ICD-10) is the latest version of the World Health Organization's (WHO) international standard for classifying diseases and health problems. ICD-10 is used by healthcare providers around the world to code diagnoses and procedures for reimbursement and statistical purposes.

The United States is scheduled to transition to ICD-10 on October 1, 2023. This transition will have a significant impact on healthcare providers, as they will need to learn a new coding system and update their software and systems. The Last-Minute Guide to ICD-10 is the ultimate resource for anyone who needs to understand and implement the new ICD-10 coding system.

ICD-10 Code Breaking: Understanding ICD-10: A Last Minute Guide to ICD-10 for Coders, Non-Coders, and Clinical Teams by Matthew Graydon
