Draper begins by tracing the roots of Trump's foreign policy in his long-held belief that America has been taken advantage of by its allies and adversaries alike. He shows how Trump's "America First" agenda has led

to a dramatic shift in US foreign policy, with the president withdrawing from key international agreements and alliances and embracing a more unilateral approach.

Draper then examines the specific military interventions that have taken place during the Trump administration, from the airstrikes in Syria to the deployment of troops to Afghanistan. He provides a detailed account of the planning and execution of these operations, and he assesses their impact on the ground. Draper also interviews key players in the Trump administration, including former Secretary of Defense James Mattis and former National Security Advisor John Bolton, to gain their insights into the decision-making process.

Draper's analysis is both critical and nuanced. He acknowledges the successes of the Trump administration's foreign policy, such as the defeat of ISIS in Iraq and Syria. However, he also raises concerns about the administration's reliance on military force, its disregard for international law, and its willingness to alienate key allies.

'War in the Age of Trump' is a must-read for anyone who wants to understand the direction of America's foreign policy. It is a timely and important book that sheds light on one of the most consequential presidencies in American history.
